

Allestree. 1629.

A New Almanack and Prognostication

of our Lord God,

And from the creation 5591  
Being the first fro Leap-year

Calculated and properly con-

ferred to the longitude &  
sublimity of the Pole  
Articke of 52 & 53. deg.

Mutor pro temporis ratione.

By Richard Allestree.

London Printed for the Com-  
pany of Stationers.

BIBLIOTHECA  
LAMBERTIANA

*Ad amicum suum charissimum M. R. Allestree  
de Libro hoc Prognostico.*

*Abdita stelliferi referans mysteria Cæli,  
quid signent nobis astra cornuæ Poli,  
Quid pluvias Ventos, tempestatesque sonoras  
excitet, his pulsas, undè serena dies,  
Illesâ pietate, doces; namquè omnibus istis  
Causam Causarum in facis esse Deum.*

R.W.

Vpon what dayes the Fayres of the Borrow of  
Derby are to be kept this present yeare,  
1629. as followeth.

- T**He first is vpon Friday in Easter weeke.  
2. The fourth and fift daies of May.  
3. The Friday in Whitson weeke.  
4. The 19. day of Iune, being Friday.  
5. The 25. of Iuly, being S. James day.  
6. The 25, and 26. daies of September.

A necessarie and perfect rule for euer, to know when  
the 4 Termes begin and end: and how many  
Returnes are in euery Terme.

Eight daies before a Terme shall be,  
The Exchequer openeth certainly:  
Except the Terme of Trinity,  
Which openeth but foure daies before assuredly.

1. **Hillary Terme** beginneth the 22 of **Ianuary**, (if it be  
not **Sunday**) but then the next day after: and endeth the 12  
of **February**: and hath 4 **Returnes**.

Octabis Hillarii	Craftino Purificationis
Quind. Hillarii	Octabis Purificationis

2. **Easter Terme** beginneth 17 **dayes** after **Easter**, and  
endeth 4 **dayes** after **Ascension day**: and hath 5 **Returnes**.

Quind. Pasche	Mense	Quind. Pasche
Tres Pasche	Pasche	Craftino Ascensionis

3. **Trinity Terme** beginneth the next day alwayes after  
**Corpus Christi day**, & endeth the **Wednesday** fortnight after.  
Note that **Corpus Christi day** is alwayes the **Thursday** after  
**Trinity sunday**: and hath 4 **Returnes**.

Craftino Trinitatis	Quind. Trinitatis
Octabis Trinitatis	Tres Trinitatis

4. **Michaelmas Terme** beginneth the 9 of **October** (if it  
be not **Sunday**) and endeth the 28 day of **November**: and  
hath 8 **Returnes**.

Octabis Michael	Craftino Animarum
Quind Michael	Craftino Martini
Tres Michael	Octabis Martini
Mense Michael	Quind. Martini

Put is my **Calendar** following, you what and both the  
beginnings and endings of the **Termes**, & al their **Returnes**  
set down: upon the dayes of the month that they fall upon.  
this page, 1629.

**Vulgar Notes of**

The Iulian, Soligenian, or English account for this yeare,  
1629.

The Lilian, Gregorian, or Roman account for this yeare,  
1629.

Sundayes after Trinitie, are this yeare, 25

Intervallū minus, siue numerus hebdomadarum & dierum inter Natalem, Dom. & Ektō mihi hebdo, 8. dierum 6. Dominicæ post Trinitatis. 24

Charles our Soueraigne King, did begin his reigne over Great Brittain, Anno 1625. March the 27. & hath reigned 4 yeeres complet at this yeare 1629. March.

Veneris ingens sidus, cum antegreditur Solem *παραρτος*  
Græcè, Lucifer Latinè dicitur: Cum subsequitur, & ab occasu refulget, vesper, vesperugo, & *ἑσπερος* ap Pellatur.

This Golden Planet Venus is Orientall from the beginning of the yeare, to the 6 of Iuly following, rising before the Sunne all that time, and thereof called Lucifer: and our bright and glittering Morning Starre. And from the 6 of Iuly afore-said, vnto the 24 day of Aprill Anno 1630. Shee is Occidentall, and our glittering Evening Starre, setting after the going downe of the Sunne and therefore termed Hesperus vel Vesper: that is the Evening Star, and continuing so long.

**A most plain and easie Table shewing the true  
time of the beginning, continuance, and yeares, since  
the reigne of each King & Queene in this Land, from the  
Conquest, vntill this yeare, 1629. Gathered forth of  
Chronicles, and heretofore set forth by others  
for profitable vse.**

**Pisces The feete.**

In the 7. or last colunne of this my Almanacke, toward  
the right hand, you haue the houre & min. of the sun rising  
for euery day in the year, at London: which houres & min.  
are halfe the length of the same night. For example: the 5.  
of Ian. the Sun riseth at London at 8 of the clocke, & no  
min. the length being doubled, maketh 16. houres and no  
min. the length of that night. And to know the time of the  
Sun setting in the same place through the yeare, take the  
houres & minutes found in the Almanacke for sun rising  
from 12. and you shall haue the Sun setting left: which  
being doubled, is the length of that day. Example: Ian.  
the 5. day aforesaid, the sun riseth at 8. & no min. take  
8. from 12. and there resteth 4 the houre of sun set that  
day, 4 being doubled, maketh 8. houres, the length of that  
day, and so of all the rest. This is very easie.

January hath xxxi daies.

March the Moone hath 30 dayes.

All Peares and Apples, Peaches, Milke, and Cheefe,  
Salt meats, red-Deere, Hare, Beeffe, and Goat ; all these  
Are meats that breeds ill blood and Melancholly,  
If sidke you be, to feed on them were folly.

Aprill the Moone hath xxix. dayes.

Chuse wine you may shall serue you all the yeere,  
 Well-fauour'd, tasting well, and colour'd cleare :  
 Fiue qualities there are, wine's praise aduancing,  
 Strong, beautifull, fragrant, coole, and dancing.

May the Moone hath 30. dayes.

If in your drinke, you mingle Rew with Sage,  
All poyson is expeld, by power of those,  
And if you would withall lusts heate assuage,  
Add to them two the gentle flower of Rose.

June the Moone hath 29. dayes.

In Spring your dinner must not much exceed,  
 In Summers heate but little meate shall need :  
 In Autumne beware you eate not too much fruite,  
 With Winters cold, full meales do fittest suite.

July the Moone hath 30 dayes.

Ripe Cherries breeds good blood, and helps the stone.  
 If Cherry you do eate, and Cherry-stone,  
 To close your stomacke, well this order suites :  
 Cheese after flesh, Nuts after Fish or Fruites.

August the Moone hath 30. daies.

The choice of meats to health doth much auaile,  
 First, Veale is holsome meat, and breeds good blood :  
 So Capon, Hen, and Chicken, Partridge, Quaile,  
 The Pheasant, Woodcocke, Larke, & Thrush be good.

September the Moone hath 29 dayes.

Milke is for Agues and for head-Ach nought,  
 Yet if from Agues fit you feele you free :  
 Sweet Butter wholesome is, as some haue thought,  
 To clesse and purge some paines that inward be.

October the Moone hath 30. dayes.

Cheese is an heauy meat, grosse, and cold,  
 And breedeth costiuenesse both new and old :  
 For healthy men, may Cheese be wholsome food,  
 But for the weake and sickly, 'tis not good:

November the Moone hath 29. daues

Against the Collicke, take Nettle-seed and Hony,  
Is Physicke, better none is had for money,  
It breedeth sleepe, stayes vomits, Flegmes doth soften,  
It helpes him of the Gout, that eates it often.

December the Moone hath 30. daues.

In great Consumptions learn'd Physicians thinke,  
'Tis good on Goats or Camels milke to drinke:  
Cow's Milke, and Sheepes do well: but yet an Asses,  
Is best of all, and all the other passses.

Cimmo, Harlepo. Cadiz, Gascoigne, Brittain.	0,0
Biskep, Galizia, Portugall.	0,0

The vse of this Table is easily had, by adding or subtracting the houres and minuts from the time of the full-sea at London bridge, noted in the diarie of my Almanacke, in so doing it sheweth you the time of full-sea in all these places above noted : with this Caution, that Winds, Land-floods, the Moones Latitude, may bee an hinderance, or fortherance of the time, an houre more or lesse.

Allestree. 1629.

An Appendix vnto the  
precedent Almanacke, for  
this present Yeare of  
*Grace. 1629.*

Wherein you may Obserue a briefe  
Chronology of Yeares; some Astrono-  
micall notes; a Cronography of the foure  
Quarters of this Yeare, with some notes  
of Physicke, Husbandry and Gardning;  
viesfull and pleasant to all those  
that are desirous of such a  
Werke,

By Richard Allestree.

GOD maketh lightnings with raine, and  
bringeth forth the Wind out of his Treas-  
ures. *Iere. 10. 13.* Thus Nature is an  
order prescribed, and set downe by God  
to.

---

Imprinted at London for the Company  
of Stationers. 1629.

**Euphemismus, or Boni ominis cap-  
tatio. And also some Astronomicall  
Calculations for this present  
Yeare. 1629.**

**T**H E two great Luminaries, the Sunne and  
Moone will suffer three Eclipses this yeare  
current 1629 one of the Moone, and two of  
the Sunne, of the which none of them will be  
seene, or be conspicuous upon our Horizon  
of great Brittain, thanks be to God: Nihil  
enim hocet illis regionibus in quibus non videtur. Thus  
may you see how the Order or Gender of time, the  
quickner or slower of life to all vegetatives and sentitives  
(under God,) and the eye of the King, Kingd Sol (Al-  
meane) and the Moone or *luna* *regina* *astrorum*, oculus noctis:  
and *desponsa* *dia*, *Regina* *astrorum*, the Queene of the  
Starrs his wife, sheweth themselves soopenfully three  
times this yeare, to Fountaine Parions.

The true Tropicall yeare, or apparant magnitude is  
of dayes 365. of houres 5. of minuts 55. 26. sec. 24 thirds.

The true Direction at the Equinoctiall is 28. degrees,  
21. minutes, 46. seconds, 10. thirds, 45. fourths.

Saturne is retrograde from the 20 day of January, to  
the 11 of June, all the yeare else he is direct.

Jupiter is direct from the beginning of the yeare, to the  
16 of May, and from the 11 of September, to the end  
of the yeare, and all the yeare else he is retrograde.

Mars is direct from the beginning of the yeare, to the  
14 of November, from thence to the end of the yeare  
direct.

Venus is all this yeare direct in motion.

Mercury is from the beginning of this yeare, to the 29  
of March, and from the 19 of April to the 24 of July,

## A Prognostication.

and from the 15 of August to the 16 of November, and from the 8 of December, to the end of the yeare, and all the yeare else he is retrograd.

Under the Equinoctiall line 60 minutes or miles, doe answer to one degree vppon the earth, but in our paralell where the Pole is rayed almost 53 degrees, one degree of latitude answeres but 36 miles.

And they that dwell vnder the Equinoctiall, haue their longest day in the yeare but 12 houres.

The longest day with them at Ward house, where the Pole is eleuated 71 degrees, and our Centurers that goe into Moscouia doe touch in their Voyages: their longest day in the yeare is 73 of our dayes long together, without any night betweene, which time of the yeare, is from the 6 day of May, to the 18 of Iuly.

The length of the day with them that dwell vnder the North pole, is in length halfe of our yeare together without any night betweene: The other halfe of their yeare, is all night together without any day betweene.

And in Greene-land the Sunne setteth not in 2300. houres: Pea, here in England the selfe same day differeth in length, as appeareth at these places following.

At	{	London	{	the longest	{	17. houres, and 30. min.
		Derby		day in the		16. houres and 44. min.
		Yorke		yeare is		16. houres, and 58. min.

Thus you may see there is 28 minutes of an houre betweene the longest day in the yeare at London and Yorke.

A degree is a rate of proportion, and doth signifie the 360 part of any Circle. the whole circumference of Heauen and also of the earth is 360. degrees. I demand then, how many miles doth answer to 360. degrees, and every degree answering to 60 miles, I multiply 1800 by 360. and there riseth 648000. which I diuide by 30. the degrees in one sign, and so the Quotient will be 21600. whereby I know that 21600 miles doth answer vnto 360. degrees in the Skie: and this is meant vnder the Acquinoctiall.

A Cro-

Allestree. 1629.

A Cronography of the foure Quar-  
ters of this Yeare. 1629.

1. Solstitium Hyemale, The stay of the Sunne in Winter, or our Winter Quarter, according to Astro-  
nomy, entered the last yeare 1628. the 11 day of Decem-  
ber, at 6 a clocke, 46 minutes, 47 seconds in the morning,  
(but more naturally in this our Northerne climate, a-  
bout the midst of November,) at what time the Sunne  
entered into the first minute of the imaginary cold and  
dry signe Capricorne, at what time with vs, the dayes  
are at the shortest, and the nights at the longest in all  
the yeare.

2. Aequinoctium vernum, or our Spring Quarter, be-  
ginmeth Astronomically the 10 day of March, at 7 a  
clocke, 17 minutes, 25 seconds in the morning, and en-  
derth the 21 of June following, (but more naturally with  
vs about the 8 day of February.) Albamazar saith that  
Saturne being situated in the third face of Libra, and in  
his Septentrionall Latitude, signifieth the warmnesse  
of the aere, and moistnesse of the weather: So that  
there are likely to haue a kindly and naturall Spring for  
the most part: Much darke and glooming weather for  
the greatest part of this yeare; and he being retrograde  
in his motion, sheweth more sickneses and infirmities  
of men, and women, seruants, and vile persons this yeare  
then ordinary, with many quartaine feauers.

3. Solstitium Aestivum, or our Summer Quarter,  
according to Astronomy, beginneth the 11 day of June,  
at 11 a clocke, and 13 minutes, 21 seconds before noone,  
at what time the relesse Sunne entereth the first minute  
of the backward moouing Cancer, making our longest  
day, and shortest night with vs in all the yeare, at what  
time

## A Prognostication.

in the Sunne beginneth to make his South declination, and to bee mounted vp vnto the highest poynt of his ascendent, (but this Quarter beginneth more naturally about the middelt of May,) this quarter continueth vnto the 13 day of September. This Quarter is liketo bee much blacke, darke, and cloudy weather, which will proue a hindrance vnto the quicks speede of Harvest.

4. Autumnall Aequinoctiall, our Autumne or Harvest Quarter, beginneth Astronomically the 13 day of September, at one of the clocke, 39 minutes, 3 seconds in the morning: at which time the Sunne cutteth the second Equinoctiall ligne Libra, making with vs againe equall day and night.

This Quarter endeth vppon the 12 day of December. But this Quarter beginneth more naturally about the 15 day of August. There is like to bee some suddaine fierce windes the 22, 23 dayes of September, and the next 14 dayes of October, and the like againe about the 15, 16, of November.

*Qui sapit, ille animum fortuna preparat  
omni,*

*Transumque potest arte levare  
malum.*

Anatomy of wonder great I speake, and yet  
am dead,

Men sucke sweet iuce, from these blacke  
veines, which mother wisdoms bred.

Certaine

Allestree. 1629.

Certaine Physicall Notes and Obser-  
uations.

**T**he World consisteth cyther of things insus-  
tible, as of Spirits, or visible, as the Hea-  
uens, the Elements, and the bodies compo-  
sed of Elements, to then, (if the foure hu-  
mours doe exceede or alter that proportion in  
mans body) that God created them at the be-  
gining, either in quality, or quantity, then shortly after  
commeth diseases and sickneses, and to the body decrea-  
seth. Wee may assure our selves that it is true, and that  
the Moone hath vnder God, as a second instrumentall  
cause, superiorty and domination vpon the foure hu-  
mours of mans body, as Cholter, Blood, Flame, and  
Melancholly: Doctor De- in his 103 Aphorisme. Cith  
thus; Luna potentissima est humidaum rerum moderatrix,  
humidatq, excitatrix & effectrix. So at the best Doc-  
tors doe hold this opinion, that all the infirmities which  
naturall come to a yman (and not by any mis chance,  
or suddaine accident) doth proceede and come by the de-  
stemperance of the foure humours: so wee may well con-  
clude, that if the head of a Fountaine doth alter his  
course, or be infected, then the adiacentiaall, or belong-  
ing streames must needs differ cyther in quality or quan-  
tity. So likewise the Moone being of a passing quality,  
collecteth and retayneth the good or euill influence of  
that Planet to whom shes adioyned or applied, as well  
as she rectifieth and retayneth the light of her Husband  
the Sunne, as we see by prooofe every night in the ycare.  
As that Famous Philosopher Hermes saith in his As-  
tronomathemattikes; Luna ve o stella sue benifica sue ma-  
lifica fuerit) utri se applicuerit, illi suffragabitur. And be-  
cause her Orbels neereit w<sup>o</sup> the earth, she sendeth vs  
downe the vertue and influence of all the other Planets,  
and to cauleth the mutation, or alteration of the Wea-  
ther, and of mens Bodies, to health or sicknesse, this  
or that, according to the nature of the Planet, with  
whom she is adioyned or configurated, and the part of  
the

## A Prognostication.

the Zodiacque wherein she is situated. Dice: Hippocrates, quod medicus primo aspiciet Luna quando est plena lumine, quia tunc crescit sanguis & medulla in omni homine & medulla in bestiis omnibus & ogmentem in Mari, & in cunctis mudanis rebus. Ad Aristotle sayth. Deus & natura nihil agunt frustra: God and Nature hath done nothing in vaine. And I will giue one reason more, if any thing vpon the earth, sensible, or naturall, were of one Element: no sicknesse could hurt it, nor disease corrupt it, but euery compounded thing vpon the earth, seeing it hath had a beginning of the foure Elements, it must needs of necessity dye.

These words before written, doth not frustrate the words of the Holy Ghost spoken to Adam: In that day that thou eatest thereof, thou shalt dye the death. For these words, The same soule that sinneth, shall dye. Where the cause of death, I satisfully beleue is sinne. The afore-sayd teacheth evidently, that wee may take an occasion lawfully vpon this matter, to come to the true Astronomy and Astrology of Christians, which is to contemplate the glory, infinite power, wisdom, goodness, greatness, mercy, and loue of our Almighty God by his great worke of the Heauens: The Heauens declare the glory of God, and the earth sheweth the worke of his hands, &c. We are not as the Heathen, or the Stoickes, that beleue in the Planets, and taketh them for their Gods, and trusteth in them.

The afore-sayd things being well considered, as they are sayd in briebe: Therefore let Physicke and Medicines be ministred on such dayes, and aspects of the Moone, with the Planets as followeth, if you can know them. But aboue all remember this: Medicus solum requirit, That is, when the Physick is not payd, the disease goeth backward.

If therefore you desire to helpe, strengthen, or comfort the vitall, or liuely power, whose seate is in the heart: you must vse things temperately hot and dry, or hot, and moist, and at such time as the Sunne is strong, and well affected with the friendly beames of Iupiter, and Luna.

The naturall Vertue governed by Iupiter, and Venus, and Luna, and seated in the Liuer, wherein are ingendered the foure humors (spoken of before) and is fortified else

Allestree, 1629.

Especially by Iupiter. If we use hot and moist things, at such times as Iupiter is well disposed in the Horoscope or configured with Venus, and the Moone being Fortunate.

The smallest vertue distinguished into the intellectual part which Mercury governes, is the sensitive part of the Moone which Iupiter and Venus doe rule, and is best comforted under the afore-said Planets well disposed, and with medicines temperate and agreeable to their natures.

The vertue attractive (one of the foure lesse principall and inhering vertues) retaineth in heate and drynesse, and is fortified by things of hot nature, the Moone passing under Aries, and Sagitary, and well aspected of Sol, or Mars fortunate, or the Moone in any other signe so aspected, and Aries or Sagitary ascending In domo vix.

The vertue retentive delighteth in cold and dry things by the influence of Saturne, and is best comforted, the Moone seated under Taurus, Virgo, or Scorpio, and applying with a friendly aspect unto Saturne, or the Moone in another signe so aspected, and eyther Taurus, or Scorpio ascending in the East point.

The vertue digestive is best strengthened by heat and moisture, and the influence of Iupiter, and is best helped when the Moone is under Gemini, Libra, or Aquary, and aspected of a friendly Planet, or if she be in some other signe, then it is fit that eyther Gemini, Libra, or Virgo, be rising in the ascendent.

The vertue expulsive delighteth in coldnesse and moisture, and that by the influence of the Moone well aspected, and placed in Canero, Scorpio, or Piscibus, while one of these signes are ascending.

Give any medicine that is good against wormes, a day before and after the new Moone, the like time use for Caraplasmes.

These things are apparent enough to well qualified Philosophers to prove the Sunne, Moone, and Stars, are instruments, and secondary causes to worke upon all compounded bodies, under the Dike of the Moone, by their Motions, Revolutions, Periods, Situations, Coniunctions, Oppositions, Cosmical, and Acronical rising and setting, and therefore I referre you for this time, to good and authentick Authors. The Heavens cause the earth to fructifie, and the Clouds drop fatnesse.

Horum

## A Prognostication.

Horum observatio ut non officit religioni, ita si ad usum  
dextere ac prudenter accommodetur, utilitatem habet non  
contemnendam.

[illegible]

Certaine briefe Rules for Husbandry,  
Gardning, &c. superstitiously attribu-  
ted to the Moone, mouing vnder  
the 12. Signes of the Zo-  
diacke.

Salomon sayth, *He that observeth the Wind  
shall not sowe, and hee that regardeth the  
Clouds, shall not Reape.*

**B** The Astrologer say, before you plant or graft, &c. consider the wind, for if it be in the North, or East, it is perilsous. And I say, that for the planting, sowing, setting, feeding, and preserving of sundry things, that places, and times of different nature and quality, are to be chosen and observed: Non omnis fert omnia tellus. And to the premises considered, you may plant, and graft the Moone increasing, in Tauro, Aquario, or Capricorno; (and the best of all upon ~~the~~ *Monte Tuesday*) Crescens enim Luna iunior in auge & corpora implet, Decrescens minuit & exhaust. Good to lay or graze Cattle, the Moone increasing, in Ariete, Sagitario, or Capricorno.

Good to sow in fall kinde of Come and Seedes, the  
Moone being extra impedimentum, in Ariete, Cancro,  
Virgine, Libra, or Capricorno. The Moone in Tauro,  
Virgine, or Capricorno, and in \* or Δ, aspect of Saturne:  
To sow or plant in Gardens, to cast into the ground, to  
digge, plow, or delve, and to drasse your Vines: If you  
sowe

## Allestree. 1629.

sow in moyst ground, or the nature of your Seedes be moyst, the time is afirst after the full Moone; if it bee dry, it is better in the increase: But the Seedes whose rootes be round, must be sowne, as Onions, Cabbages, or Turneps, &c. three or foure dayes before or after the Full.

Gather Apples and other fruites, Peaches, and Flow-  
ers, to haue them in most beauty, and greatest vertue,  
the Moone at the Full. Sow or set Carthe, Lettice,  
Parsnies, Carrets, Pease, and Beans, two dayes be-  
fore or after the full Moone. Sow seedes of heabes for  
fodre, in the increase, from February unto June. Good  
to fell Timber for building, in the wane of the Moone,  
for the aboyding of Clopes, from Mid-summer, until  
January.

Good to plash hedges, fell wood to burne, that the  
Stockes may the better grow againe, the Moone in-  
creasing in Ariete, or Libra. Cut Willows in February or  
March, the Moone in Ariete, Tauro, or Libra. Remooue  
Trees in the same Signes all the last Quarter, in Se-  
ptember, September, or February. Dug your Land,  
that the weeds may not abound, in the last quarter.

The Moone in Libra, or Aquario, is good to Till the  
Gardens, and also to sow or set it, to set plants, and also  
to make a Hop yard, or set Hop-poles.

Sheare Sheepe, cut downe your Hay, and cut your  
Haire to grow the sooner, in the increase. Kill fat Swine  
neere the Full Moone, for the fat, the better to indure  
the boyling.

Good for abstractions or weanning of Children, about  
the Full, or the Moone vac curt, to make them the more  
willing to forgiue the Napp or Nurse.

Good to distill Comes, Haire, Cloues, Cloues,  
and to payre the Payles, cut them all in the last Quarter  
of the Moone, and the in conjunction with Saturne or  
Mars. For my part, I doe attribute nothing to the time,  
Stars, Aspects, and the foure Elements; but inch as  
Masters of Physicke and Surgeons, or rather Chyrur-  
gions attribute to many of their Apothecary Dugges,  
Medicines, and Cataplasmes: For when they doe admit  
it, or vse them, they are not sure that they will take  
effect, neither do we or they see, this shall come to passe,  
or that Medicin shall take effect: And both they and  
wee, for ought that I know, doe vaine with nothing  
else

## A Prognostication.

esse, but by Gods direction, and with his naturall and good Creatures. I doe know, and also doe beleene that Almighty Gods government of the Heavens, Starres, and Elements, taketh not away the lawfull vie and means of his instruments or good Creatures, (as some would have it) at this time stand ever together to the end of the World. And so I end for this yeare.

*Law Deo.*

### An Abstract of a direction, concerning Reall Contracts.

**W**Hosoever shal desire to purchase, or put to Sale, to take to lease, or let to Farme, to Grant, Assigne, Exchange, or otherwise to Contract, or Deale, with or for any Lands, Leases, Rents, Annuities, Mansion-houses, Offices, or other Estates saleable, of what Sort or Value soever, or to save any such from danger of Forfeiture. May either in their owne names, or in the name of any other trusted by them have secure means with all Priuacy requisite; for the speedy effecting what shall bee desired on the one part or on the other in any the Cases aforesayd or the like, as by daily vsage is found. At the Porcht-House against St. *Andrewes* Church in Holborne. *LONDON.*

God saue our gracious King *Charles.*
